REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

None of the prior art discloses the claimed electrical interconnection arrangement as being recited in the independent claims of the present invention.

Claims 1, 3, 4, 6 – 8, 13 – 15 recite inter alia an electrical interconnection arrangement for mating to a PC board comprising a cable laminate adapted to receive a plurality of twinaxial cables; an interposer including a plurality of spring contacts; wherein said interposer has a first side adapted to mate with said cable laminate and electrically connect said plurality of spring contacts each to one end of said plurality of twinaxial cables; and wherein said interposer has a second side adapted to mate with the PC board and electrically connect said plurality of spring contacts to mating contact points on the PC board, thereby electrically connecting said twinaxial cables to the PC board.

Claims 2, 5, 12, 16, and 17 recite inter alia an electrical interconnection arrangement comprising an adapter adapted to receive a twinaxial cable; and first and second coaxial cable type connectors located on said adapter; wherein an inner conductor of said first coaxial cable type connector is electrically connected to a first inner conductor of said twinaxial cable and an inner conductor of said second coaxial cable type connector is electrically connected to a second inner conductor of said twinaxial cable; and wherein an outer shell of said first and second coaxial cable type connectors is connected to an outer conductive shield of said twinaxial cable, thereby

Art Unit: 2839

enabling said twinaxial cable to be electrically connected to two coaxial cable type connectors.

Claims 9-11, 18-19 recite inter alia an electrical interconnection arrangement comprising a plurality of adapters each adapted to receive one of a plurality of twinaxial cables; and first and second coaxial cable type connectors located on each of said adapter; wherein an inner conductor of said first coaxial cable type connector of each said plurality of adapters is electrically connected to a first inner conductor of its respective twinaxial cable and an inner conductor of said second coaxial cable type connector is electrically connected to a second inner conductor of its twinaxial cable; and wherein an outer shell of said first and second coaxial cable type connectors of each of said adapters is connected to an outer conductive shield of its respective twinaxial cable, thereby enabling each of said plurality of twinaxial cables to be electrically connected to two coaxial cable type connectors.

The art of record does not disclose the claims' limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
